Brand Guidelines

Brand logos

We have adjusted these 2 **logos** to always include the Stellar Monogram.

Download Logos

Typography

Two main serif and sans-serif fonts paired for branding.

Lora — **Lora** is used for longer headlines and subhead, also it can be used for body copy.

Inter — **Inter** is used for captions, body copy, or other detailed uses only.

	Online RGB 0 / 167 / 181 HEX # 00A7B5	Print PANTONE 7710 C CMYK 81 / 0 / 23 / 0
	Online RGB 0 / 46 / 93 HEX # 002E5D	Print PANTONE 648 C CMYK 100 / 71 / 9 / 58

Graphics

fine-dotted textures, fluid gradients, and subtle noise to create a sense of depth and atmospheric movement.

Highlights

Icon Guidelines

The icons have been developed following the parameters outlined below to ensure visual consistency across the system.

Grid

All icons are designed on a 128×128 px grid and must not exceed this area.

To maintain visual balance, icons should fit within the square grid or within the rectangular or horizontal areas defined inside the grid (see examples 1, 2, and 3).

Optical adjustments are allowed when necessary to achieve consistent visual balance across the full icon set.

Color Palette

Stroke Weight

On a white background, strokes must always be black.

On a black background, strokes must always be white.

The standard stroke weight is 1 pt.

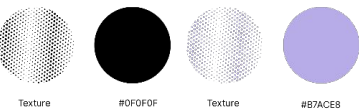

For specific details that require emphasis, a 1.5 pt stroke may be used (see example 4).

Texture

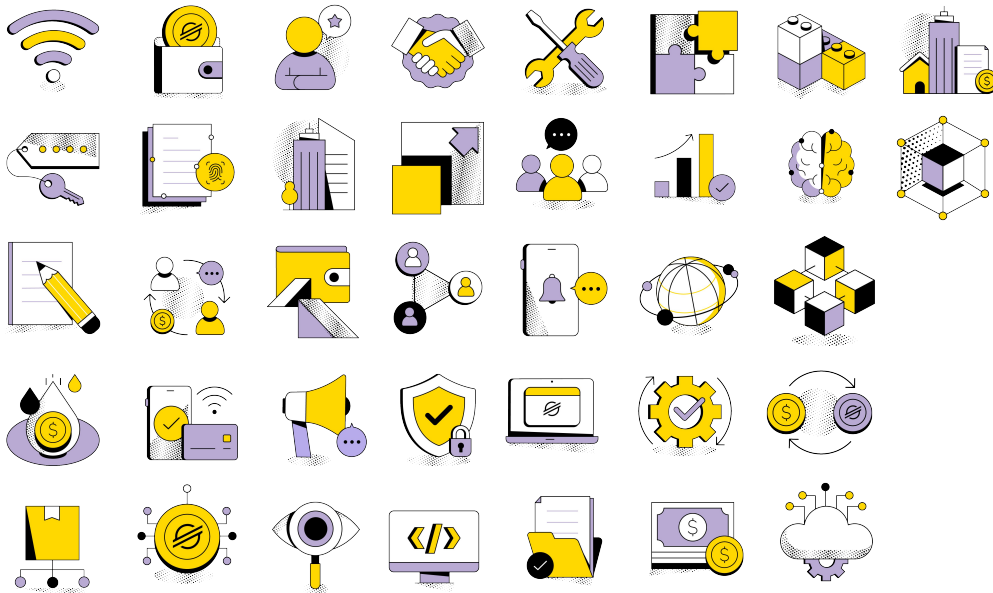

Textures must be applied only at the scale defined in this file. On a light background, the texture must be exclusively black (#0F0F0F). On a black background, the texture must be exclusively #B7ACE8.

The dot size must not be increased or reduced. The texture is built as a pattern (motif) and must be used accordingly, without any modification.
